RedPlanet Patient Demographic Screen

Commitment to Quality

Quality is defined by experience, commitment and service

Experience is no small matter. ArcSYS customers aren't waiting around for a problem to arise. They are confident that their software is properly configured and maintained for optimal performance.

"ArcSYS forward thinking experience allows me to get over putting out the typical fires." Cheris Craig – Atlanta Women's Clinic

"Our issues never become problems. We contact ArcSYS and the issue gets resolved immediately." Vicky Lyon – Bear Creek Pediatrics

The experienced ArcSYS team has been committed to delivering the most efficient software solutions and the most personalized customer support in the medical management industry.

RedPlanet Practice Management

Comprehensive integrated practice management solutions

AR Billing

Red Planet's AR Billing makes the task of managing A/R simple and efficient. Whether managing multiple AR's or easily report on daily batch totals, Red Planet delivers a simple solutions to complex tasks. The A/R system can be used as a standalone module or can be integrated with the state of the art EMR system.

Claims Processing

Red Planet offers the most advanced solutions in claims management. Red Planet will automatically detect errors prior to printing or submitting claims electronically. Red Planet efficiently tracks secondary and tertiary claims upon remittance. With Red Planet, there is no limit to the number of insurance combinations a patient may have. There is no need to review charts in an effort to locate old insurance information. You can even track future policy changes and store them based upon an effective date.

Appointment Scheduling

Customize calendar options and electronically navigate and manage patient and provider schedules at multiple locations with options to view daily, weekly or monthly.

Collections

Allow the system to automatically prompt you for pre-determined actions regarding both insurance and patient collection activity.

Patient Recall

Track patient treatment and protocol and then generate patient reminders via email, text, or phone.

CERTIFIED FOR MEANINGFUL USE

"The need to leverage information technology in the healthcare industry is huge – as the quality of care and efficiency benefits that come with computerization can really make a difference in the overall patient experience. We're ready to help transform the industry by providing the sophisticated software testing services that ensure that vendors and hospitals are offering systems that are capable of meeting the meaningful use standards required to obtain incentive funds as well as the rich functionality required to move the clinical care needle forward," says Rik Drummond, CEO of the Drummond Group. "We have been testing software for more than a decade and are ready to leverage our extensive experience handling sophisticated systems in complex industries as well as dealing with complicated technical issues such as interoperability and security."

Our Promise to you:

The largest cost associated with an EHR system is the of implementation, including a loss of physician productivity. Our goal at ArcSYS is ZERO loss in physician productivity. Our applications are designed around efficiencies in data entry and data extraction. We won't stop until you are completely satisfied.

RedPlanet Electronic Medical Records

Red Planet EMR is carefully designed to improve the quality of clinical care, reduce clinical risk and ultimately reduce the cost of care. As with all ArcSYS applications, Red Planet is scalable for virtually any size clinic. Red Planet is replete with numerous user defined preferences that allow complete and comprehensive access to critical data.

Red Planet EMR integrates fully with the patient accounting and scheduling applications allowing the clinician to access vital insurance verification information as well as review follow-up procedures from one simple screen.

Red Planet EMR allows providers to extend care beyond the clinic. Red Planet can automatically generate follow-up documentation such as letters, prescriptions, and patient education printouts. HL7 protocols allow for integration with hospitals, labs, and pharmacies.
